Introductions for 1943

"De Petris Introductions"

ANACONDA:—A large flowered commercial incurved possessing excellent substance and color. It is a free and easy grower with resistance to disease. Forms clean strong medium tall stems with beautiful dark green medium sized foliage. Produces large blooms uniformly from any bud. Flowers do not shatter nor bruise easily from shipping or handling. The color is deep coppery red with golden bronze reverse, a shade very similar to the old variety David Roy. Date of maturity November 10th to November 15th. It will produce two good blooms to the plant with unusual uniformity. When shaded for early October flowering the color is a rich golden copper. We recommend this variety for its ease of culture, its high quality of blooms and its appealing color.

CASSANDRA:—A medium sized pompon having a fully rounded form and excellent substance. Strong stems carrying rigid well formed sprays. Produces bright orange bronze blooms with a crispy substance. The color does not fade or go dull as the flower matures. It responds to shading

and is an excellent variety for cloth-house. Will produce an early crop of flowers without fading. Matures normally November 5th to 10th. Cassandra produces an average number of high quality blooms which do not shatter and requires the same cultural treatment as the varieties Mrs. Bulkeley and Rev. Bushnell.

GOLDEN SURPRISE:—A bright sulphur yellow pompon shading to golden yellow. Blooms on well formed sprays with rigid pedicils. The variety is of extremely easy culture, and possesses excellent glossy green foliage which is disease resistant. Matures November 20th to 25th when yellow pompons are in great demand.

SEAFOAM:—Pure white large pompon having a full center and well rounded form. The blooms are produced on rigid and well spaced sprays. A free and easy grower. Responds well to shading and well suited to cloth-house culture. Blooms November 20th to 25th. This variety produces freely high quality white pompons at a period when they are badly needed.

"Bristol Nurseries Introduction"

GOLD IMPERIAL:—A quality Pompon ready to cut about November 10th. The large, perfectly-formed golden-yellow blossoms show a deeper yellow-orange center—a touch of distinction the market welcomes. The plant of a vigorous upright habit, foliage clean and healthy, good

branching sprays, substance and keeping qualities excellent in every respect.

Awarded C. S. A. Silver Medal, Boston 1940; First Prize Intermediate Class, Yellow, Boston 1941.

"Yoder Brothers Introductions"

NAVAHO:—Designed for a cloth house, medium, decorative, red pompon. It blooms normally November 5th. Color is deep crimson; reddish bronze under early shading. Responds well to shading and fills a great need for a cloth house variety in its color range. Growth is strong and uniform. The $2\frac{1}{2}$ inch flowers are well spaced on fine sprays. Stems are dark and hard; foliage is glossy, deep green. Plant June 1-10. Final pinch July 10-15. C. S. A. Silver Medal at Boston in 1941.

ENCHANTRESS:—Enchantress is a beautiful deep pink anemone. As a disbud its blooms are 6 inches in diameter; as a disbudded spray it reaches 4-5 inches. The cushion develops fast and well, giving the variety a season of December 5th and later, just a few days earlier than that of the well known variety Dark Pink Supreme. Growers of late Chrysanthemums will find Enchantress a useful addition to their list of varieties. Plant June 15-20. Final pinch August 1-5.

PIXIE:—Pixie is a large, well rounded button pompon, 1½ inches in diameter. Its color is deep golden yellow. The normal blooming date is November 10th. Pixie has proven very valuable for early shading. The plant is productive; the flowers are produced on stiff, wiry stems with good spray formations. This variety will respond well under a wide diversity of cultures. Plant June 5-10, Final pinch July 10-15.

CARILLON:—Carillon is a beautifully formed pink spray single. The color is a brilliant Valencia pink. Its season, December 20th and later, further adds to the rapidly growing list of valuable late varieties. Form and substance are good with the flowers spaced well on rigid sprays. Growth

is fast, unusually free with no blind or vegetative tendencies. Plant June 20-25. Final pinch August 5-10.

SPUN GOLD:—This variety has been on trial for several years under extensive plantings. It ranks among the highest producing pompons we know of. Spun Gold is a large decorative pompon; deep lemon yellow in color. It blooms December 15th and later. The stem is medium and strong. The flowers are well spaced on rigid sprays. Spun Gold has proven equally dependable under raised bench or ground culture. We believe it to be another bread-and-butter variety in the same late group as Snow. Plant June 15-20. Final pinch August 5-10.

Three Valencia Family Additions

GOLDEN JANE:—A brilliant golden intensification of the original buff bronze Jane. Much brighter and more vivid in color.

APRICOT VALENCIA:—An entirely new and beautiful deep apricot buff sport from Dark Pink Valencia. Ranks apricot bronze as Valencia ranks pink.

RED VALENCIA:—A sport from Valencia with a very versatile new color. It is a soft, pleasing tint of Brazil red.

Indianapolis Yellow

This lemon yellow sport from Indianapolis Pink is another valuable addition to the very popular Indianapolis family. We think this is the best yellow Mum for its specific flowering date.
